PROFESSIONAL SUMMARY

SDET with 4 years of experience in designing and executing automation frameworks focused on UI and API testing using Selenium WebDriver and RestSharp (C#/Java). Proven ability to lead testing efforts during critical deliveries, contribute across multiple Agile scrums, and deliver high-quality outcomes for enterprise healthcare clients. Automated 100+ test cases, reducing regression testing time by 75%. Strong exposure to Codeium AI for script generation and CI/CD-integrated test execution.

Skills

UI Automation: Selenium WebDriver, C#, NUnit, Java, TestNG
Frameworks: POM, Data-Driven, Hybrid
Build/CI Tools: Git, Jenkins
API Testing: Postman, Rest Sharp, Rest Assured
Test Management: Azure DevOps, QTest
Tools and Platforms: Visual Studio/Visual Studio Code, Eclipse, Codeium AI

WORK EXPERIENCE

Cognizant Technology Solutions
Sr. Quality Engineer | 2022 May – Present
Client: HUMANA Healthcare Insurance

UI Automation

- Designed and maintained end-to-end UI automation suites for major regression cycles across HUMANA's healthcare insurance platform.
- Automated critical workflows across multiple browsers ensuring cross-browser compatibility and consistent UI behavior.
- Integrated Codeium AI for automation script generation, reducing development time by 30%.
- Utilized Git for version control and integrated automation scripts with CI/CD pipelines (Jenkins) for seamless execution.

API Automation (C#)

- Built and maintained API automation frameworks using RestSharp (C#) to validate RESTful services supporting HUMANA's insurance workflows.
- Designed data-driven API test suites covering functional, regression, and negative scenarios for critical backend services.
- Validated request/response payloads, status codes, headers, and schema integrity using automated assertions.
- Tested end-to-end API integrations across multiple services and consumers, ensuring seamless cross-system communication.
- Integrated API test suites into CI/CD pipelines via Jenkins ensuring continuous backend validation with every build.

Leadership & Collaboration

- Led testing efforts during critical emergency production fixes, ensuring rapid test coverage, minimal downtime, and on-time delivery.
- Contributed across multiple Agile scrums covering Functionality, Stability, API, Security, and AI Modernization work streams — from individual contributor to team lead.
- Collaborated with cross-functional teams (developers, BAs, DevOps) for requirement analysis, test strategy definition, and defect triaging.
- Mentored junior SDETs on automation frameworks, test case design, and UI/API testing best practices.
- Actively participated in Agile ceremonies — stand-ups, sprint planning, reviews, and retrospectives.

KEY PROJECTS – HUMANA

- **RxManagement API Enhancements – Greendale Phase 1Validated** - newly developed APIs and endpoints covering positive, negative, and edge case flows. Ensured seamless E2E integration across multiple services and consumers within HUMANA's Rx management ecosystem.
- **RxManagement API Enhancements – Greendale Phase 2 -** Tested internal automation processes triggered via API calls upon meeting defined business criteria. The solution significantly reduced manual intervention, saving time and operational costs for business teams.
- **Centerwell Specialty – DTC/DTE Volume Expansion -** Following successful Greendale implementations, validated enhancements to existing endpoints to accommodate high-volume data ingestion requirements driven by increased business scale.
- **Centerwell Specialty – P3 Integration -** Contributed to a high-visibility enterprise integration initiative consolidating multiple systems under a unified P3 platform. Managed complex cross-team dependencies and integration challenges, delivering successfully on schedule.

ACHIEVEMENTS

- Received "**ABOVE & BEYOND**" award at the QEA SBU Townhall from SBU Head-QEA for exceptional performance and contributions.
- Recognized as "**Automation Enabler**" for completing over 39 automation scripts in a single release cycle.
